DETAILED ACTION

Claim Objections

1. Claims 10, 19, 22, and 29 are objected to because of the following informalities:
Appropriate correction is required.

Each claim recites a limitation "operative to" or "operable to" which is not considered as a positive recitation. Under MPEP 2106, page 2100-8, "language that suggests or makes optional but does not require steps to be performed or does not limit a claim to a particular structure does not limit the scope of a claim limitation."

In claim 22, Examiner recommends to amend the preamble as "A processor readable medium encoded with computer executable instructions".

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 1-9, 12-18, and 23-28 are rejected under 35 U.S.C. 101 as not falling within one of the four statutory categories of invention. While the claims recite a series of steps or acts to be performed, a statutory "process" under 35 U.S.C. 101 must (1) be tied to particular machine, or (2) transform underlying subject matter (such as an article or material) to a different state or thing. See page 10 of In Re Bilski 88 USPQ2d 1385. The instant claims are neither positively tied to a particular machine that accomplishes

the claimed method steps nor transform underlying subject matter, and therefore do not qualify as a statutory process.

The method including steps of estimating or computing as recited in claim 1 or claim 23 is broad enough that the claim could be completely performed mentally, verbally or without a machine nor is any transformation apparent.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3 and 16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear what is meant by "the matched filter method" or "the matched method " as recited in claims. Furthermore, each claim has lack of antecedent basis.

Allowable Subject Matter

5. Claims 11, 21, and 32 are allowed.
6. Claims 10, 19, 20, 22 and 29-31 are allowable the claim objection is cleared.

Response to Arguments

7. Applicant's arguments filed 5/13/2009 have been fully considered but they are not persuasive.

Regarding claims 1-9, 12-18, and 23-28, Applicant argues that the 102 rejection is overcome with the amendment of preamble for claims 1, 12, and 23. However, the claims still are rejected under 35 USC §101, because status of the steps in the body of each claim are not changed.
